

Sleeve Front

Sleeve Back

Notes: Solid RED line is the sleeve outer edge. Dashed BLUE line is the printable area that design elements must be inside. Dashed GRAY line is the approximate position of the pre-glued seam. Backside pre-printed recycling and patent # will be printed on all sleeves. Each side is divided into four horizontal stripes - only one color may be used in each stripe. This template is provided as an aid for use in design layout; the position of your design relative to color stripes and pre-printing is an *approximation*.
